All iPad models come with built-in 802.11n Wi-Fi. If you want to extend your network coverage further, choose iPad with Wi-Fi + 3G and sign up for access to 3G data service.*

Take a network with you wherever you go.

iPad with Wi-Fi + 3G offers superfast data speeds up to 7.2 Mbps over 3G cellular networks around the world. It's perfect when you're out and about with no access to a Wi-Fi network, because you can still get a fast connection for surfing the web, sending and receiving email, or getting directions. Since iPad seamlessly switches between 3G and even faster Wi-Fi, you always get the best connection available. And with AT&T data plans, you'll have access to over 20,000 Wi-Fi hotspots, including Starbucks, Barnes and Noble, and more.

Frequently asked questions about 3G service.

What is the difference between the Wi-Fi and Wi-Fi + 3G models?

All iPad models come with built-in Wi-Fi. The Wi-Fi model allows you to connect to available Wi-Fi networks to surf the web, check email, and more. The Wi-Fi + 3G model allows you to also access the Internet over 3G cellular networks — the same networks used by mobile phones — which is perfect when you're not within range of a Wi-Fi network.

What do I need to connect to a 3G network with my iPad?

All you need is an iPad with Wi-Fi + 3G and a 3G service plan from AT&T. The service plan is sold separately.

What are the 3G data plan options from AT&T?

There are two monthly data plans: 250MB and 2GB. There's no contract, and you can sign up and change your service right on your iPad. In addition, AT&T data plans include unlimited access to over 20,000 Wi-Fi hotspots at locations including Starbucks and Barnes & Noble.

How can I find out if I have 3G coverage in my area?

Simply enter your street address, city, and state or zip code in the [AT&T Data Coverage Viewer](#).

Am I required to purchase a data plan if I buy an iPad with Wi-Fi + 3G?

No. When you're ready to use 3G service, just sign up right on your iPad. You can use the built-in 802.11n Wi-Fi to access the Internet at any time.

Can I use my current iPhone service plan with the iPad?

No. The cellular plan for iPhone is separate from the iPad plan.

Can I use my iPad while traveling outside the U.S.?

You can connect to Wi-Fi hotspots anywhere in the world. Please check with AT&T regarding international 3G usage, as additional charges may apply.

Are iPhone and iPad SIM cards interchangeable?

No. Your iPhone SIM card will not fit into your iPad.

What happens when I reach my monthly limit?

As you get close to your monthly data limit, you'll receive onscreen messages to help you decide whether to purchase an additional data plan or wait until the current plan automatically renews at the end of the 30-day period. You can also check your data usage anytime in Settings.

How do I sign up for an AT&T 3G data plan?

On your iPad, tap Settings and choose Cellular Data. Then type in your user information, select a plan, and enter your credit card information. There's no need to visit a store or call customer service.

[Learn how to sign up, monitor, and manage your 3G service — all from your iPad](#)

Recurring Domestic Plan Options

No-contract 3G service.

In the United States, 3G service is available through a breakthrough deal with AT&T. You choose the amount of data per month you want to buy — 250MB or 2GB. You'll receive onscreen messages as you get close to your monthly data limit so you can decide whether to turn off 3G or upgrade your plan. Best of all, there's no long-term contract. So if you have a business trip or vacation approaching, just sign up for the month you'll be traveling and cancel when you get back. You don't need to visit a store to get 3G service. You can sign up, check your data usage, manage your account, or cancel your service — all from your iPad.

AT&T 3G Data Plans for iPad

Data per month	Price per month
250MB	\$14.99
2GB	\$25

One month is based on 30 consecutive days, and starts at the date and time of your purchase.

Sign up, monitor, and manage your 3G service — all from your iPad.

Sign up on your iPad.

You can sign up for 3G data service with AT&T at any time — right on your iPad. There's no need to visit a store or call customer service. Just tap Settings and choose Cellular Data. Then type in your user information, select a plan, and enter your credit card information.

Recurring Domestic Plan Options

The selected plan will start immediately. Your credit card will automatically be billed every 30 days, on the date your current plan ends.

250 MB of data for 30 days for \$14.99	
2 GB of data for 30 days for \$25	✓

Payment & Billing Information

------	---	------------	----------	------

credit card number

Account Overview

Cellular Data Number: 408-555-1943

data plan	250 MB of domestic data per month
status	150 MB used / 100 MB left for 5 days
billing period	08/23/10 to 09/22/10

- Add Data or Change Plan >
- Add International Plan >
- Edit User & Payment Information >

Monitor your data usage.

You can check your data usage in Settings on your iPad anytime. iPad will even let you know when you're about to reach your data limit. You'll get three alerts — at 20 percent, 10 percent, and zero. With each alert, you can choose to add more data or wait and do it later. Tap Now and iPad opens the Cellular Data Plan window so you can update your data plan.

Manage your data plan.

iPad makes it easy to choose the data plan that works best for you. When you need more data, you can add another 250MB or upgrade to the 2GB data plan. Because you sign up for a data plan in monthly increments, you can cancel your plan at any time and then sign up again whenever you need 3G service.

Current Plan Status

You have 250.0 MB of data left for 29 days

Plan Options

The selected plan will start when the current plan expires. Your credit card will automatically be billed every 30 days, on the date your current plan ends.

iRead PDF

iAnnotate PDF

Description

iAnnotate is an elegant PDF reader and a powerful annotation tool -- and consistently one of the best-selling apps for the iPad. You can open documents from email, sign and send out contracts, enter notes for edits, sketch diagrams, copy text, and add highlights or underline with the drag of a finger!

Unlike other apps that only let users draw on top of a PDF, iAnnotate fully integrates its annotations directly into the PDF such that they will be available to any standard PDF readers like Adobe Reader or Preview.

iAnnotate is designed for heavy-duty work: the thumbnail-based file manager allows you organize your PDFs by folder and instantly search the full-text of all of your PDFs to find exactly what you're looking for.

Features:

- A complete annotation system: Text Notes, Highlight, Underline, Free-Form Drawing, Stamps, Bookmarks, and more.
- Graphical File Manager: Document thumbnails make finding and browsing your library even easier.
- VGA output: Use the iPad VGA dock connector to display your documents onto an external projector or monitor.
- Fully Customizable Toolbars: Reposition and resize toolbars, and drag-and-drop to configure tools included on each.
- Tabbed PDF Reading: Quickly switch between multiple open documents.
- Easy transfer of PDFs: Send and receive PDFs via email, Dropbox, through iTunes sync, by browsing to any PDF link, or using our free desktop transfer software.
- Comprehensive PDF support: Copy-and-paste text, view existing PDF annotations, support for internal and URL links, and PDF outline/bookmarks support.
- Document and full-library search: Search your entire PDF library to instantly find all documents with any keyword.
- APS (Aji PDF Service): Free companion desktop application for easy sync with your existing desktop PDF collection.
- Aji Support: integrated application help and tips, and top-notch email and forum support.

For easy synchronization with your desktop PDF documents, get the Aji PDF Service from the support link below or at:

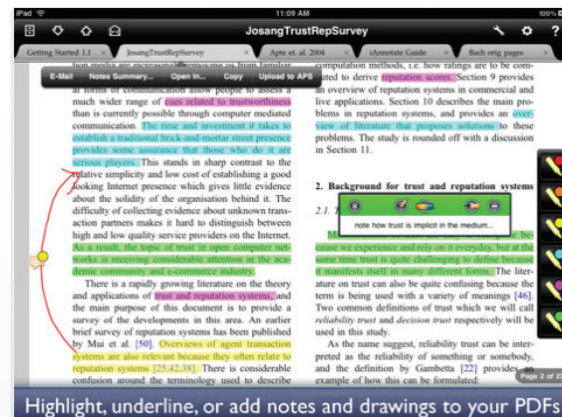

http://www.ajidev.com/iannotate/

What's New in Version 1.3.1

1.3 Graphical, thumbnail-based file manager. Create and manage folders, move and duplicate files, and work with multiple selected documents. Stamp annotations: choose from our large built-in library of stamps, import your own custom stamp images, or create stamps from your drawing/signature annotations.

1.3.1: Fixed bug that caused some PDF documents to be unnecessarily protected.

iPad Screenshots

Highlight, underline, or add notes and drawings to your PDFs

Drag-and-Drop Document Management

NOTE: This program will allow on the fly mark up of PDF proofs (First or Final) in front of an advertiser that can then be email back to production before even leaving the clients office.

Description

Keynote, the powerful presentation application for Mac, has been completely redesigned for iPad. It makes creating a world-class presentation, complete with animated charts and transitions, as simple as touching and tapping.

Keynote has everything you need to create amazing presentations, including beautiful Apple-designed themes, custom graphic styles, and stunning animations and effects. Start quickly with a theme and add the slides you need with just a few taps, selecting any of eight slide masters. You can also open a Keynote '09 or Microsoft PowerPoint file.

Use the predefined text styles or pick from a selection of text options to personalize your slides. Add photos and videos from the Photos app using the Media Browser. Make your photos look great with designs that match your theme, or add masks, shadows, reflections, and picture frames all just by touching. Organize your data with beautiful tables and charts. Then bring your presentation to life with high-quality animations including Magic Move, Flip, and Spin.

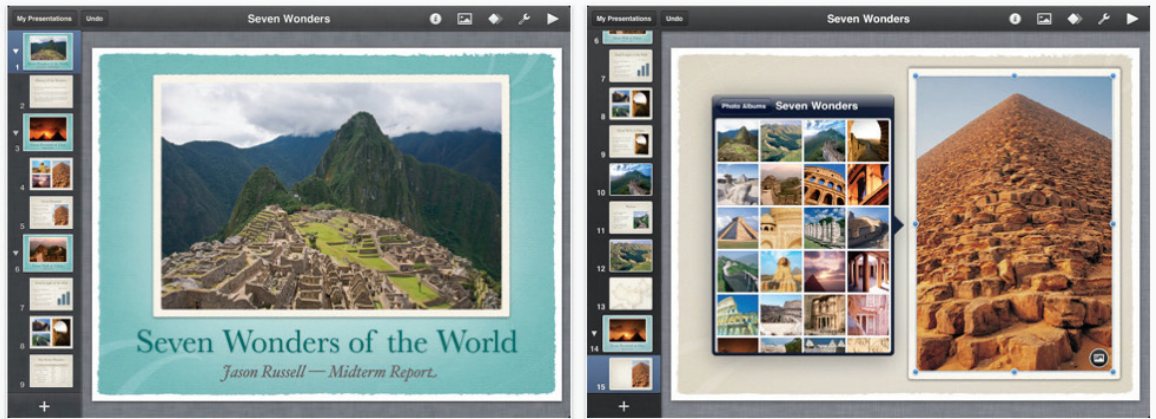

When your presentation is ready, you can use the full-screen view to play it right on your iPad. If you're presenting to a large audience, connect your iPad to a projector using an optional adapter. You can also send your presentation in Keynote '09, Microsoft PowerPoint or PDF format to anyone via Mail or iWork.com public beta, or copy it to your MobileMe iDisk, your Mac or PC, or to the web using WebDAV.

Using Keynote, you can:

- View and edit Keynote '09 or Microsoft PowerPoint presentations from Mail, the web, your MobileMe iDisk, a WebDAV service, or your Mac or PC using iTunes File Sharing.
- Share your work by exporting it to Keynote '09, Microsoft PowerPoint, or PDF format and send it via Mail. Or, publish to iWork.com public beta.
- Choose from 12 Apple-designed themes including Gradient, Showroom, and Portfolio.
- Arrange the objects on your slides by simply dragging them on the slide canvas.
- Create sophisticated animations by using Magic Move, which automatically animates objects across consecutive slides.
- Animate objects on slide with over 20 builds.
- Choose from over 20 professional-quality slide transitions including Anagram, Page Flip, Mosaic, and Twist.
- Quickly add your photos and videos from the Photos app with the Media Browser.
- Organize your data with beautiful charts and tables.
- Skim through your presentation, add new slides, and reorder slides with the slide navigator.
- Work without worry as presentations are automatically saved whenever you make a change.
- Use the Undo button to go back through your previous changes — even the next time you open your document.
- Show your slides on a large screen by attaching your iPad to an external display or projector with the optional iPad Dock Connector to VGA Adapter.
- Copy presentations from your iPad to your MobileMe iDisk, a WebDAV service or directly to your Mac or PC using iTunes File Sharing.

Numbers

Numbers

The most innovative spreadsheet app ever designed for a mobile device.

\$9.99 Buy App

Description

Numbers, the powerful spreadsheet application made for the Mac, has been completely redesigned for iPad. Tap the bright Multi-Touch display to create compelling, great-looking spreadsheets in minutes. With over 250 easy-to-use functions, an intelligent keyboard, flexible tables, and eye-catching charts, all the answers are at your fingertips.

Numbers has everything you need to organize data, perform calculations, and manage lists. And you can do it all with just a few taps. Start with one of the beautiful Apple-designed templates and add your own tables and charts or open a Numbers '09, Microsoft Excel or CSV file. Use predefined styles for tables, charts, images, and text to customize the look of your spreadsheet.

Enter data with ease using the intelligent onscreen keyboards — they're designed specifically for working with numbers, text, dates, and formulas. Perform simple or complex calculations with over 250 functions that let you create your own formulas using a dedicated function keyboard and built-in help. Forms make it easy to enter data in a table when you're on the go. And, in full-screen view, Numbers instantly summarizes selected data in different ways — by sum, average, min, max, and count. With a quick swipe, you can even see your data as a chart.

When your spreadsheet is complete, use full-screen view to show your work right on your iPad. You can also send your spreadsheet in Numbers '09, Microsoft Excel or PDF format to anyone via Mail or iWork.com public beta, or copy it to your MobileMe iDisk, your Mac or PC, or to the web using WebDAV.

Using Numbers, you can:

- View and edit Numbers '09, Microsoft Excel, and CSV files from Mail, the web, your MobileMe iDisk, a WebDAV service, or your Mac or PC using iTunes File Sharing.
- Share your work by exporting it to Numbers '09, Microsoft Excel, or PDF format and send it via Mail. Or, publish to iWork.com public beta.
- Choose from 16 Apple-designed templates including Budget, Travel Planner, and Running Log.
- Organize your data with great-looking charts and tables.
- Use an intelligent keyboard designed to enter dates, formulas, text, or numbers.
- Assemble formulas with over 250 functions, including built-in help.
- Create a form from any table for quick data entry.
- Drag across your data in full-screen view to get an instant summary or chart.
- Navigate your document with ease using tabs to jump from one sheet to another.
- Quickly add photos and videos from the Photos app with the Media Browser.
- Work without worry as spreadsheets are automatically saved whenever you make a change.
- Use the Undo button to go back through your previous changes — even the next time you open your document.
- Copy spreadsheets between your iPad and your MobileMe iDisk, a WebDAV service or directly to your Mac or PC using iTunes File Sharing.
